EXECUTIVE PRODUCT BRIEF · 2026

Run every event with executive clarity.

A unified command centre for revenue, event operations, vendors, budgets, teams, RFQs, reputation and market intelligence.

One operating picture.

From boardroom decisions to the final load-out—without losing the detail that protects margin and reputation.

THE INDUSTRY REALITY

Events move fast. Information usually does not.

Most agencies coordinate high-value, time-critical work across spreadsheets, chat threads, inboxes and individual memory. Leadership sees the whole picture too late.

01

Fragmented control

Commercial, production and vendor information lives in separate places.

02

Margin leakage

Budget variance and quote risk surface after commitments are already made.

03

Execution blind spots

Calendar conflicts, team overload and vendor readiness are hard to see early.

04

Reactive leadership

Executives spend time collecting updates instead of making decisions.

“The real opportunity is not another event tool. It is a shared operating system for the entire agency.”

THE PRODUCT VISION

One command centre. Two levels of intelligence.

Executive intelligence

Booked and projected revenue, margin exposure, pipeline, reputation, capacity and market signals—designed for faster portfolio-level decisions.

CEO | COO | CXO | CFO

Operational control

Schedules, production status, vendor readiness, RFQs, budget lines, assignments and deadlines—designed for daily execution.

EVENT DIRECTOR | OPERATIONS | PRODUCER

Connected context

Every event links commercial value, people, suppliers, timing and customer outcomes.

Decision-ready signals

Exceptions and risks are visible before they become expensive on-site problems.

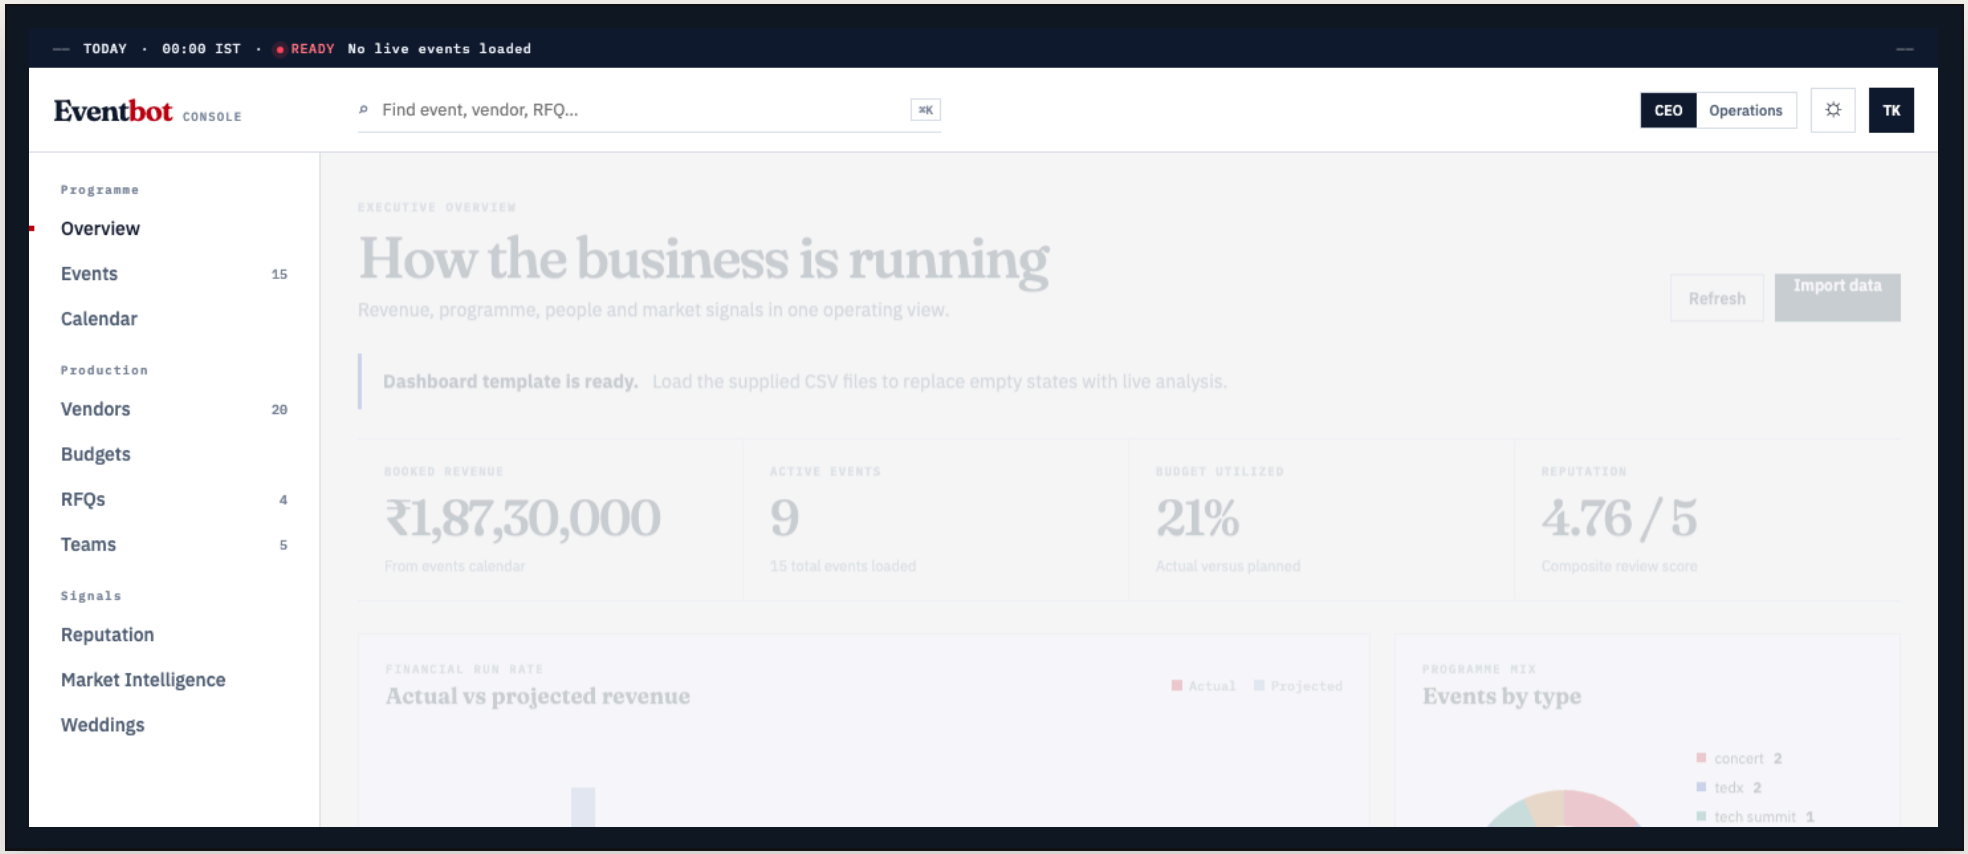

Built for action

Leaders can move from portfolio insight to the responsible workflow in one place.

EXECUTIVE OVERVIEW

The agency, visible at a glance.

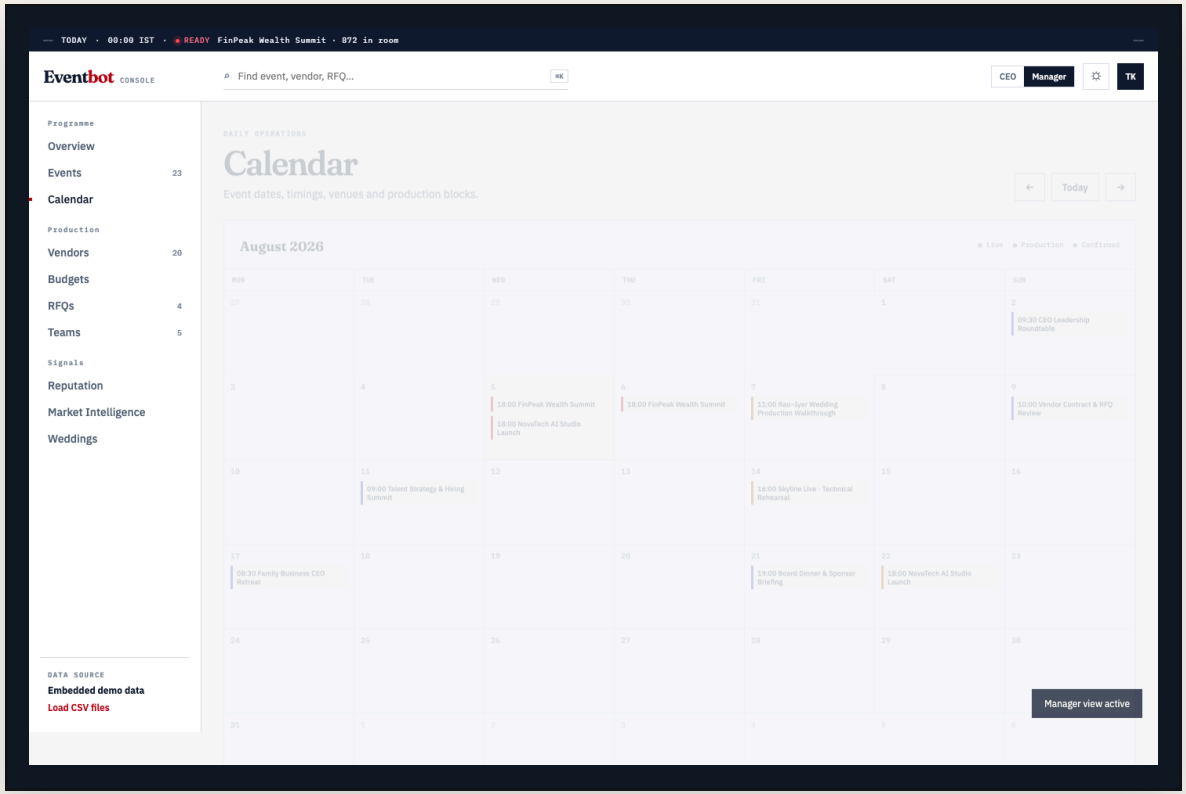

Leadership sees the most important financial and operational signals first, with a CEO/Manager view built into the same product.

ILLUSTRATIVE PRODUCT INTERFACE · RESPONSIVE EXECUTIVE DASHBOARD

DAILY OPERATING RHYTHM

Turn the calendar into an execution map.

Eventbot connects what is happening, when it is happening, who owns it and what may block delivery.

01 **See the load.**
Month, week and agenda views expose overlaps and critical dates.

02 **See ownership.**
Filter by team, venue, vendor and event type.

03 **See readiness.**
Open the event context without rebuilding the story from messages.

04 **Act from mobile.**
Agenda-first layouts keep teams aligned away from the desk.

VENDOR & PROCUREMENT CONTROL

Protect delivery quality and buying power.

A structured vendor directory brings reliability, pricing and operational readiness into one decision surface.

Compare intelligently

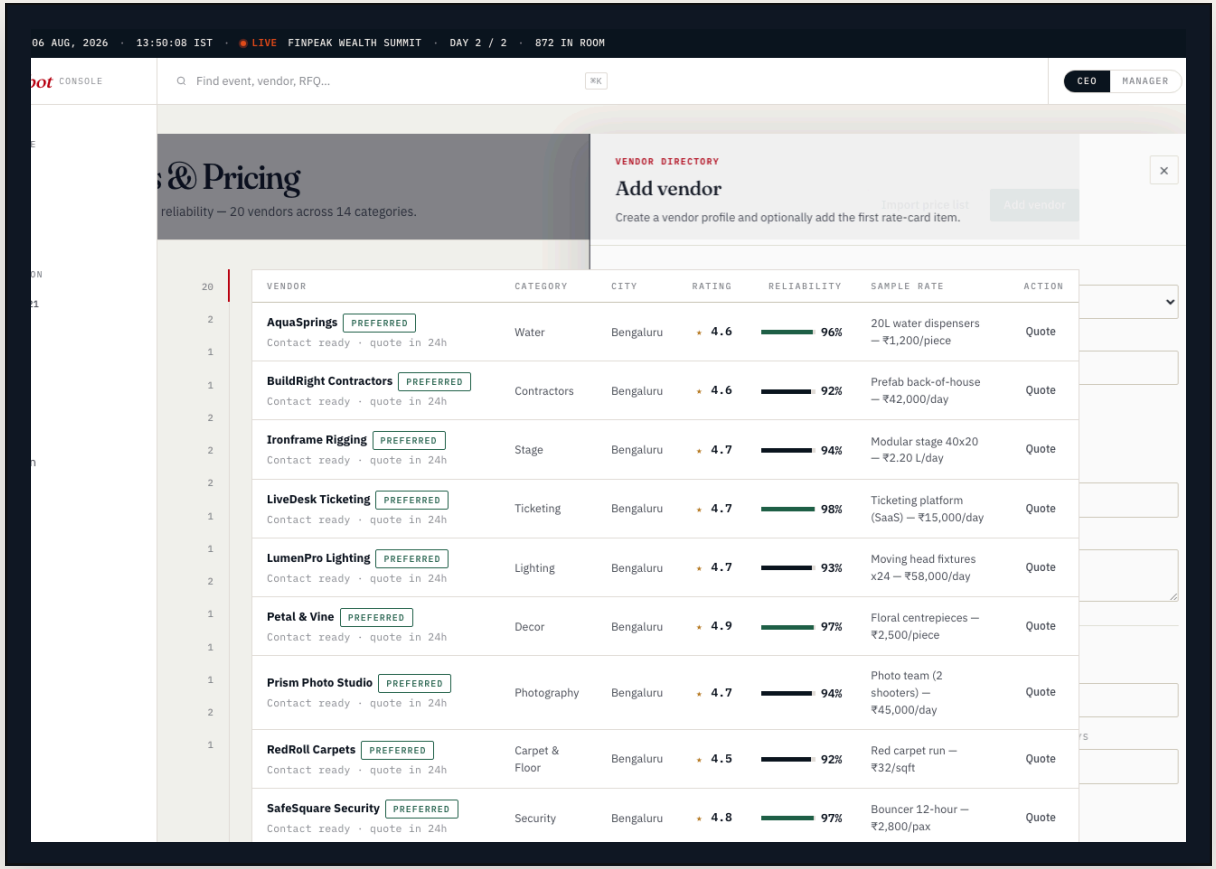

Evaluate price alongside reliability, rating, lead time and preferred status.

Build institutional memory

Keep rate cards, contacts and operational notes available to the entire agency.

Move faster

Create vendors and their first rate-card items without leaving the workflow.

OPERATIONAL WORKFLOW · RESPONSIVE VENDOR DRAWER

ROLE-BASED VALUE

Different decisions. One trusted data model.

CEO / MD — GROWTH

Portfolio revenue, pipeline, strategic risks, reputation and market opportunity.

Decision: Where should we focus, invest or intervene?

COO — DELIVERY

Event readiness, calendar pressure, vendor dependencies and team capacity.

Decision: Can we deliver every commitment reliably?

CFO / Finance — MARGIN

Planned versus actual spend, budget exposure, RFQ comparison and projected margin.

Decision: Where is profit at risk?

CXO / Client Lead — EXPERIENCE

Client context, milestones, reputation, reviews and service-quality signals.

Decision: What protects trust and repeat business?

The interface changes emphasis by role—without creating separate versions of the truth.

CONNECTED WORKFLOW

From opportunity to outcome.

Eventbot connects the operating lifecycle so every decision carries its commercial and delivery context forward.

01 / WIN	02 / PLAN	03 / BUY	04 / DELIVER	05 / LEARN
Pipeline & market	**Event & calendar**	**RFQs & vendors**	**Teams & budgets**	**Reputation & insight**
Track opportunities, event types, competitors and expected value.	Set milestones, venues, attendance, owners and production windows.	Compare quotes, reliability, lead time and pricing before award.	Monitor assignments, capacity, spend and readiness during execution.	Capture reviews, performance signals and lessons for the next event.

Less status-chasing

Shared visibility reduces manual update collection.

Earlier intervention

Risk becomes visible while leaders can still change the outcome.

Repeatable excellence

Vendor, budget and delivery knowledge stays with the agency.

BUSINESS CASE

Measure impact where agencies feel it.

EXECUTIVE PRIORITY	EVENTBOT CAPABILITY	OPERATIONAL SIGNAL	BUSINESS MEASURE
Protect margin	Planned vs actual budgets; quote comparison	**Variance and ceiling alerts**	Gross margin by event; budget variance
Increase delivery reliability	Calendar, readiness and ownership	**Conflicts, overdue milestones, blockers**	On-time milestones; incident count
Improve procurement	Vendor rate cards, ratings and RFQs	**Price + reliability comparison**	Quote cycle time; vendor performance
Use teams effectively	Assignments and utilization	**Overload and unassigned work**	Utilization; overtime; capacity gaps
Strengthen client trust	Event context and reputation tracking	**Reviews, NPS and service signals**	Repeat business; NPS; average rating
Grow intelligently	Pipeline and market intelligence	**Opportunity and competitor signals**	Win rate; pipeline coverage; event mix

A credible ROI approach

Establish a baseline before rollout, then measure the change in reporting time, RFQ turnaround, budget variance, milestone adherence and vendor performance. Eventbot's value should be proven with the agency's own operating data—not generic promises.

RECOMMENDED NEXT STEP

Start with one portfolio. Prove value in the operating rhythm.

PHASE 01 · ALIGN

Define the decision model

Confirm roles, KPIs, workflows, data owners and success measures.

PHASE 02 · PILOT

Run live events

Onboard one team, a focused event portfolio and the core vendor catalogue.

PHASE 03 · SCALE

Standardise the agency

Expand workflows, reporting and intelligence across teams and regions.

Give every decision-maker the clarity to act before the event acts on them.

Eventbot Console

Executive intelligence.
Operational control.
One source of truth.
